GRANIFLEX™
DECORATIVE BROADCASTING SYSTEM

The Graniflex™ Decorative Broadcasting System is a permanent, flexible, and decorative coating system. Protecting the application surface with the SANI-TRED® products and decorating with polymer flakes, quartz, or sand, the Graniflex™ System delivers a durable performance that is slip resistant and crack resistant.

GRANIFLEX
DECORATIVE BROADCASTING SYSTEM

Top Coat: Graniseal

Broadcast Materials: (Color Flakes, Quartz, Micas, Sand)

Concrete Substrate

Permaflex™ Broadcast Coat

Optional Liquid Rubber Base™ (LRB) Coat*

Permaflex™ Prime Coat
*Add 40 mil flood coat of LRB for Crack Proof System
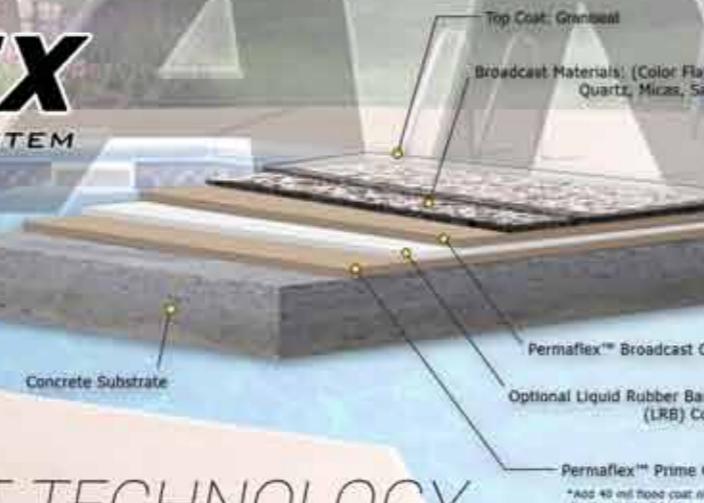

CRACK RESISTANT TECHNOLOGY

At the core of the Graniflex™ Decorative Broadcasting System is the world's one and only crack resistant liquid rubber coatings, *SANI-TRED*. These unique coatings create a deep and flexible penetration with 590% elongation that permanently bonds to concrete, wood, fiberglass, and metal.

ATTRACTIVE DESIGNS

The Graniflex™ Decorative Broadcasting System provides a granite-like re-surfacing to any application. Combining the power of *SANI-TRED* and the decor of polymer flakes, color quartz, color micas, or sand, the Graniflex™ System stands strong against the elements while providing an attractive custom designed UV resistant surface.
